

'PILLS AND POTIONS'

Tardive Dyskinesia,
Yes what, indeed, is that?
A creepy-crawly, thingimajig?
or Dr. Who's habitat?

Should you fear Daleks?
Have they invaded Earth?
Or, maybe brutal Dacoits,
From my land of birth?

Tardive Dyskinesia is, my friend
Actually none of these,
But the side effect of drugs,
Fighting brain disease.

The trembling of the body,
Reveals the truth; but yet,
Twitchy jerky joints,
Mimic a marionette!

David Woolger, January, 2013
